Custom Electric Assist Bike

The electric pedal assisted bike is a amazing invention around bike world.

Electric bikes are regular pedal bikes that provide electric assistance whenever you want it. We've modified a selection of our Custom hybrid Bikes with this easy battery-operated "pedal assist system."

The new 250w Sunstar motor is positioned in the bottom bracket and the battery is on the frame - a kind of big water bottle. It is extremely agile, but at the same time exceptionally comfortable.

The bike, despite the motor and battery is enough light and is possible also turn off the battery and enjoy cycling!

- Aluminum frame
- Carbon fork
